

MTH209 Assignment 9, IIT Kanpur

Consider minimizing the function $f(x) = (x - 5)^2$.

Starting from 2 and 6 as the two values of the vertices, write down three steps of the Nelder-Mead algorithm:

1. Step 1: $\theta_1 =$ _____, $\theta_2 =$ _____
2. Step 2: $\theta_1 =$ _____, $\theta_2 =$ _____
3. Step 3: $\theta_1 =$ _____, $\theta_2 =$ _____
