

Statistical Computing (MTH210)

Welcome to this course. I will be covering different topics on Statistical Computing. It is an emerging area and during the last 15 years various developments have taken place. We have the lectures on Monday, Thursday and Friday from 10:00 am to 10:50 am at L-05 and we have the Lab on Wednesday from 10:00 am to 10:50 am at CC02 Linux Lab (301) in NCL. The LAB will be taken by the TAs. If I miss any class, I will take an extra class either on Tuesday/Thursday from 7:00 pm.

The course will be evaluated by two quizzes, lab-work, mid-sem, one project and final examination. In each lab day, your performance will be evaluated out of 5 marks. The TAs will assign marks depending on your performance. The two quizzes will take place on (a) Feb 12, 2026 (Thursday) (b) Apr 02, 2026 (Thursday). If any of the above days becomes a holiday the corresponding quiz will be conducted the following Tuesday. If any body misses one quiz, then she/ he can take a make-up quiz on Apr 16, 2026 (Thursday). All the quizzes will start at 7:00 pm, the venue will be announced later. The project will be due on April 23, 2026 (7:00 pm). The project will be computational project. You can use any package/language. If I see any copying all the concerned persons will be deregistered immediately and the matter may be reported to SSAC.

You will be assigned the final grade based on the following weights: Quiz (30%), Lab (10%), Project (10%), Mid-Sem (20%) and Final (30%).
